CAREER SUMMARY

Multi-skilled tech creative with 5+ years building and maintaining full-stack web systems, and 3 years in cybersecurity and ethical hacking. I specialize in developing secure, scalable websites from designing responsive front-end interfaces to engineering robust back-end logic, databases, and APIs. My experience includes e-commerce platforms, educational tools, and internal business systems, all built with performance, security, and reliability in mind.

EDUCATIONAL BACKGROUND

CRAWFORD UNIVERSITY.   **2021 – 2025**
B.Sc. Computer Science

WORK EXPERIENCE

BRAND IDENTITY & VISUAL DESIGNER
AfaSpeed Automaven Engineering   **July 2025 – August 2025 (Contract, Remote)**

- Created visual assets that shaped the brand's identity, ensuring designs communicated professionalism, speed, and trust to both clients and partners.

- Designed branded materials including ID cards, invoices, letterheads, and other key documents that reinforced consistency across all touchpoints.

- Contributed to a recognizable and cohesive brand look, helping the company stand out and build credibility in its industry.

  Applied design principles to improve clarity and impact, making sure every piece felt polished and aligned with the brand's values.

NETWORK ENGINEER
MangoNet Integrated Technologies, Lagos   **June 2024 – November 2024 (Siwes / Internship)**

- Set up and maintained network infrastructure including routers and switches, ensuring stable and high-speed internet service across the company's systems.

- Monitored and optimized network performance, identifying issues like lags and timeouts and applying fixes to keep services running smoothly.

- Visited client sites to troubleshoot connectivity problems, providing hands-on support and resolving technical issues directly with customers.

- Worked as part of the engineering team to implement reliable solutions and gain practical experience in managing ISP-level network operations.

FULL-STACK WEB DEVELOPER
Edna Specialist Hospital | Lagos   **April 2024 – May 2024 (Contract, Remote)**

- Developed a responsive website for a hospital, making it easier for patients to access services, book appointments, and get information from anywhere, on any device.

- Integrated appointment scheduling features, allowing patients to book consultations seamlessly and reducing manual workload for hospital staff.

- Enabled internal communication tools, helping healthcare professionals coordinate more efficiently and improving overall service delivery.

- Streamlined hospital operations through digital access, making interactions faster, more organized, and more user-friendly for both patients and staff.

E-COMMERCE DEVELOPER
BEN-Energy MART, Port Harcourt   **January 2022 – February 2022 (Contract, Remote)**

- Built and maintained custom online stores using PHP, tailored to meet specific business needs and ensure smooth performance across devices.

- Integrated secure payment gateways including Paystack, Flutterwave, and Stripe, allowing customers to complete transactions safely and reliably.

- Developed automated systems for order fulfillment, inventory tracking, and customer analytics, helping businesses manage operations efficiently and make data-driven decisions.

- Improved product pages and optimized checkout flows, leading to higher conversion rates and a better shopping experience for users.

BACK-END DEVELOPER (PHP, SQL)

Excellent Digitals Ltd, Port Harcourt   **August 2021 – September 2021 (Contract, Remote)**

- Designed and developed a secure, mobile-friendly web platform that allows WAEC candidates across Nigeria to easily purchase e-tokens for checking their exam results.

- Integrated automated payment processing to ensure smooth transactions, reducing manual errors and improving user experience during token purchases.

- Implemented instant token delivery via SMS and email, enabling candidates to receive their result-checking codes immediately after payment, without delays.

- Built backend tools for fraud prevention and transaction tracking, helping maintain system integrity and ensuring reliable service for thousands of students nationwide.

CORE SKILLS

- Web Design & Development

- Back-End Development

- Graphic Design

- Cybersecurity & Ethical Hacking

- Network Engineering

- Database Development

- System Administration

- Technical Support & Maintenance

OTHER SKILLS

- Cloud Platforms (Hostinger, AWS, Azure, Google Cloud)

- Testing & Debugging

- Project Management Tools (Jira, Trello, Slack)

- Basic Data Analytics & Reporting

- SEO & Web Performance Optimization

- JavaScript Libraries & Runtimes (React, Node, Express)

- Payment Gateway Integration (Paystack, Flutterwave, Stripe)

- Microsoft Office
